

Check if your windshield is repairable

Windshields are repairable if:

The damage is smaller than a loonie

The damage is new (not a failed repair)

The post-repair mark is smaller than 1/4" if in the driver's critical view area

Windshields must be replaced if:

The damage is over a heating element

The damage covers a sensor or camera system

There are long cracks or other unrepairable damage

Did you know?

- You can repair up to three chips per service
- Windshield repairs don't affect your insurance premiums or future claims
- If you have ICBC Comprehensive coverage, repairs are free — you won't even pay a deductible
- Repairs must meet B.C. Motor Vehicle Act Regulations, and ICBC Repair Network facilities must meet these standards to be part of our network.
